- 12 level water selector
- Fuzzy Logic Control Technology
- Double lint filter
- Delay Start
- Child Lock option
- Remaining time indicator
- Detergent and water level indicator
- Water temperature indicator
- 24 months in home warranty

Air Jet: simply uses room temperature air, to dry most clothes inside the washing machine.

- Air is sucked into the centre of the washing tub at high power
- Air then spirals up and around the inner wall of the tub.
- At the top, it mixes with fresh air being sucked in to continue cycle
- Clothes are left dry, undamaged, tangle free and ready to wear. Lightweight items can generally be removed, ironed and worn.
- The air is not heated so won't damage your clothes like a tumble dryer.

SF-P80CJ		
Capacity	Kg	8kg
Dimensions (mm)	Width	625
	Height	947
	Depth	677
Weight (Net/Gross)	Ka	45/50
